CSLP Program Overview

Each part of an organization, from buying to shipping, depends largely on the logistics and supply chain. AIMS' Certified Supply & Logistics Professional (CSLP) is among the best logistics certifications, recognized globally. It focuses on the problem-solving capacities, thus, it makes a strong base of an individual's career. On Successful Completion of this program:

- You will comprehend the fundamentals of the logistics and supply chain.
- You will have an understanding of supply chain strategies, and how to achieve strategic fit?
- You will also understand major drivers and metrics of logistics and supply chains.
- You will understand 3PLs and 4PLs logistics service providers, and reverse logistics.

Program Structure

CSLP is designed and planned by expert faculty. It improves your capabilities in handling all points of the logistics and supply chain. Therefore, you can decrease your organization's expenditures as well as increase profits.

CSLP Coursework

Fundamentals of Logistics & Supply Chain Management
Plan and Implement Supply Chain using SCOR Model
Supply Chain and Logistics Strategies
Relationships in Logistics & Supply Chain

Global Credentials

- CSLP is awarded by AIMS - a CPD accredited and UKRLP registered institute. CPD accreditation assures that AIMS' practical and methodical approach is focused to improve professional development.
- CSLP Total Qualification Time (TQT) is 45 hours and it is designed as per Ofqual Level-3 standards of Regulated Qualifications Framework (RQF).
- CSLP is also recognized by several international bodies as a three (3) credit hours of graduate studies.

Who Should Attend?

CSLP is an internationally recognized logistics certification, which is ideal for:

- ✓ Professionals who are already working in supply chain and logistics field, and looking for a career growth.
- ✓ Graduates who are interested in making their careers in the supply chain and logistics.

Why Supply Chain Management?

Supply chain operations are becoming more complex. Successful companies rely on the skills of professionals to keep their goods and services flowing to the marketplace quickly, efficiently, and as cost-effectively as possible. It enables organizations to build a system to deliver products faster, better, and cheaper. Today, supply chain management is the backbone of organizations, and the market is looking to fill 1.5 million jobs (or 285,000 per year) by 2018.

Our Students Say!

"The supply and logistics certification by AIMS is a high value program. I found that this supply and logistics training has been specially designed to meet the global industrial demand for professionals. Participants learn both theoretical and practical expertise in managing complex logistics and supply chains of today".
